

FOIPOP Request 2021-001822-HEA

Data Notes:

- Data source is Panorama and include data from December 19, 2020-October 3, 2021 for COVID-19 AEFIs
- These data only include deaths reported as an Adverse Event Following Immunization (AEFI) for COVID-19 vaccine. The deaths reported below are temporally associated with receipt of COVID-19 vaccine (within 14 days) but does not mean that the individual died as a result of receiving the vaccine.
- AEFI:
 - The numbers included in the report reflect the number of AEFIs with a status of "Review complete", "Review complete, follow-up required" or "Follow-up complete"

AND

 - a PHAC report date entered into Panorama

1. Number of individuals in NS who died within 14 days of a COVID-19 vaccine broken down by age groups (12-19, 20-29, 30-39, 40-49, 50-59, 60-69, 70-79, 80-89, 90+)

Table 1: Number of AEFI deaths, within 14 days of COVID-19 vaccine, by age group, December 19, 2020-October 3, 2021

Age group	Number of deaths
12-19	0
20-29	0
30-39	0
40-49	0
50-59	<5
60-69	0
70-79	<5
80-89	<5
90+	0
Total	6

2. Number of individuals in NS who died as a result of COVID-19 vaccine by age group (12-19, 20-29, 30-39, 40-49, 50-59, 60-69, 70-79, 80-89, 90+)

The information system captures people who die after receipt of COVID-19 vaccine but does not capture causality (i.e., a death temporally associated with vaccine as opposed to causally associated vaccine).
